Lightweight Construction and Flexibility for Ease of Handling and Installation

- Reliable Performance Across Air and Multipurpose Applications

Fairlawn, Ohio, November 11, 2025. Continental's group sector ContiTech announced the launch of its new Continental Vantage hose product line engineered to provide dependable performance across a broad range of air and multipurpose applications.

The Vantage line introduces two versatile hose options, including Vantage Nitrile and Vantage EPDM available in both 200PSI and 300PSI working pressures. Each is designed with lightweight construction and flexibility, delivering easier handling and installation for both industrial professionals and general users.

The Vantage hose, engineered for confidence and built to perform, establishes a fresh standard in air and multipurpose performance. The product line is designed to support a wide variety of daily operational needs including pneumatic tool use and general air flow management. Users can expect consistent results that help maintain productivity in challenging environments.

Vantage EPDM hose features a durable synthetic rubber tube and cover, engineered to perform reliably across a wide range of operating conditions, from air and water to light chemical exposure.

Vantage Nitrile hose features a ARPM Class A (High Oil Resistant) tube and cover with an aramid reinforcement, engineered to perform reliably in applications where the need for oil resistance is high. It is Non-conductive with a minimum electrical resistance greater than one (1) megohm per inch of length of hose at 1000V DC. Available in 200 & 300 PSI working pressures.

> The Vantage hose portfolio showcases our ongoing commitment to delivering dependable solutions that support our customers every day," said Ben Tracey, Head of Product Management – Industrial Hose, Industrial Solutions Americas, ContiTech. "Industrial professionals rely on hose products that perform without compromise, withstanding constant movement, pressure fluctuations, and demanding site conditions. Vantage hoses are engineered for flexibility and durability, making installation easier, boosting operational efficiency, and minimizing downtime. This product line reflects our commitment to our customers by delivering versatile, high-performance solutions that help businesses to operate with confidence in the tools they trust.

The Continental Vantage hose lineup further strengthens ContiTech's extensive offering of industrial hose solutions designed to improve ease of use, efficiency, and long-term dependability.

For more information about Vantage Nitrile, Vantage EPDM, and ContiTech's full range of air and multipurpose hose products, contact your local ContiTech representative or visit hoseselect.com.
