SportContact 7 wins AUTO BILD sportscars summer tire test

- PremiumContact 7 "exemplary" in electric vehicle tire test

- Andreas Schlenke:

    All our current tires meet the requirements of electric vehicles

Hanover, Germany, March 13, 2025. The test editors of the AUTO BILD Group have once again awarded the Continental SportContact 7 and PremiumContact 7 in two tire tests. The SportContact 7, Continental's current UHP flagship, prevailed against seven competitors in the AUTO BILD sports car summer tire test. In addition, the editors of AUTO BILD rated the PremiumContact 7 as "exemplary" in their tire test for electric vehicles.

SportContact 7 dominates in dry and wet conditions

With the best handling values and the shortest braking distances on wet and dry roads, the SportContact 7 in the size 245/35 R 19 won the current AUTO BILD sportscars summer tire test. The editorial team praised the tire's sporty handling in all weather conditions, precise steering response, good aquaplaning resistance and short braking distances on dry surfaces.

The fact that the SportContact 7 not only offers more driving pleasure, but also more safety, is particularly evident when braking on wet roads: The test vehicle, an Audi TT, came to a halt almost 30 meters later in the braking test from 100 km/h with the last placed tire. This is equivalent to seven VW Golf 8s in a row.

    On dry and wet roads, the Conti dominates the sports tire scene,

In developing the SportContact 7, Continental focused on perfection in all performance criteria to combine maximum driving pleasure with maximum safety. The SportContact 7 is the ideal tire for high-performance, sporty vehicles with electric or conventional drive systems. It is approved for various models from premium manufacturers such as Porsche and BMW and is available in sizes from 18 to 24 inches.

PremiumContact 7 - a safe solution for all types of vehicles

In the 215/55 R 18 tire test for electric vehicles in the current issue of AUTO BILD, the PremiumContact 7 took second place with the rating "exemplary". In the test, it was particularly impressive with the shortest braking distance in the wet, impressive driving dynamics and good mileage. The test vehicle was a Hyundai Kona EV.

> The result of the AUTO BILD editors once again confirms that our product strategy in the field of electromobility is working,

says Continental tire expert Andreas Schlenke.

> Since its market launch, the PremiumContact 7 has impressed in numerous tests with both combustion engines and electric vehicles. All our current tires meet the requirements of electric cars and can also sustainably reduce emissions from combustion engines.
