

ICLEI, WWEA and Global100RE call for renewable energy equipment for immediate humanitarian relief in Ukraine

PUBLISHED AUG 28, 2022
BY [EUROPA](#)

With the ongoing war in Ukraine, more and more areas in the country are cut off the electricity supply, including hospitals and other places which urgently require access to power. In order to help civilians, the World Wind Energy Association WWEA and the Global 100% Renewable Energy Platform Global100RE (<http://www.global100re.org/>), supported by Global100RE Ambassador Ruslana (<https://ruslana.ua/en/>), are calling for donations of equipment which can supply power independently from the national grid, after all small and stand alone solar systems including batteries, power banks etc.

Read more about this initiative, including how to participate, [here](#).

The initiative is supported by ICLEI – Local Governments for Sustainability, a global network of more than 2500 local and regional governments committed to sustainable urban development, which is a Member of the Global 100% Renewable Energy Platform.
