Propper™ Unveils Propper Locker: A Next-Generation Agreement Platform to Rival OpenAI's DocuGPT and Challenge DocuSign

ATLANTA, GA, UNITED STATES — October 8, 2025 //— Propper™ has announced the launch of **Propper Locker**, its *Agentic Agreement Management Platform*, positioned as a bold alternative in the fast-evolving rivalry between OpenAI and DocuSign.

As OpenAI moves into contract automation and data extraction with DocuGPT—already stirring investor buzz

and shaking DocuSign's stock—**Propper Locker enters the market with enterprise-ready strength.** In an industry saturated with noise and marketing spin, Propper is cutting through with proof, not promises.

Why Propper Locker Stands Out

Feature parity with deep domain strength. Enterprise grade control, security, and compliance. Flexible workflows. Open architecture. Competitive pricing. Fast, accurate, and always improving. Not to mention a leadership team full of industry veterans who shaped the current global eSignature industry.

The launch of DocuGPT has unsettled the agreement and e-signature space, with analysts calling it a direct threat to DocuSign's dominance *(Article Link).* While many enterprises hesitate over unproven AI hype,**Propper Locker arrives with live pilots, SLAs, compliance guarantees, and full enterprise support.**

For DocuSign users, Propper Locker offers a**seamless migration path** that preserves signing capabilities while adding real AI intelligence.

Executive Commentary

"By unifying agreement management end-to-end, Propper eliminates the fragmentation and overhead driving up legacy costs. That efficiency lets us deliver enterprise-grade power at roughly half the price of leading brands—without sacrificing performance, compliance, or scale.

For clients needing full control, we offer**dedicated tenant deployments** so they can run Propper in their own environment, strengthening data sovereignty and slashing total cost of ownership by leveraging existing infrastructure. **This is a game changer.**" *— Jack Berube, CEO, Propper*

Market Context

In a market reshaped by OpenAI's entry and DocuSign's exposure,**Propper Locker stands out as the pragmatic SMB and enterprise alternative**—where control, depth, and proven capability matter as much as AI innovation.

Enterprises ready to explore the future of agreements (with accountability built in) can request a demo or participate in beta.

About Propper

Propper™ is an AI-first agreement platform designed to keep organizations in control—never boxed into someone else's ecosystem. It unifies generation, signing, consent, and post-signature intelligence in one secure, compliant stack.

With **open APIs** and **agent-ready workflows**, Propper scales from a single template to enterprise-wide automation, without proprietary traps, hidden fees, or forced dependencies.

Founded by the pioneers who built the world's largest eSignature provider,**Propper™ brings unmatched expertise to deliver an even more powerful, organization-focused platform.**
