Telefónica and Meliá Hotels International develop 5G use case

PUBLISHED FEB 9, 2023
BY TELEFÓNICA

• The solution allows offering a segmented network on which different services with different network capacities are supported, such as simultaneous translation or video streaming services.

• With this pilot, the Hotel Meliá Madrid Serrano becomes the first establishment in Spain with 5G SA (Stand Alone) indoor coverage and network slicing.

• In addition, in collaboration with Meliá Hotels International, the network slicing use case has been implemented on a commercial network, making it a pioneering experience in Europe on commercial 5G SA networks.

• This use case, in which Ericsson, Intel and Lingmo International also collaborate, is developed within the framework of projects co-funded by Red.es.
