

Telefónica and Siminn develop the first case of television roaming

PUBLISHED APR 18, 2023
BY [TELEFÓNICA](#)

- The proof of concept carried out allows a Siminn user to access his TV service from Spain via Telefónica's network. Improving the quality of the service experience and reducing the volume of traffic on both operators.
- The Open Caching standard defined by the Streaming Video Technology Alliance has been used, which allows content providers and CDNs to interconnect with each other.
- This use case is the result of the collaborative relationship that both companies have had since 2017, when Siminn became part of Telefónica's Partners Program.
