

New Volkswagen ID.7 with smart air conditioning

PUBLISHED JAN 18, 2023
BY [VOLKSWAGEN](#)

Air conditioning systems are an integral part of modern cars and ensure pleasant temperatures in all seasons. Volkswagen goes one step further in the new ID.7 and for the first time uses an air conditioning system that performs faster cooling or heating of the vehicle interior before the start of a journey. Among other things, this is made possible by electronically controlled air vents that distribute the air throughout the vehicle interior as soon as the driver approaches with the key. The new, smart automated air conditioning system also reacts to voice commands and takes into account the position of the sun as well as individual user preferences. The result is an increase in comfort with which the new electric saloon will set standards in its class.
