

The ID. Buzz(ID. Buzz/ID. Buzz Cargo – The vehicles are near-production concept cars and have not gone on sale yet.) is on its way: only one day to go until the world premiere

PUBLISHED MAR 7, 2022
BY [VOLKSWAGEN](#)

Like the other models in the ID. family, the electrically powered all-rounder is based on the modular electric drive matrix (MEB). The low centre of gravity of the battery pack, which is installed flat in the floor, enables a high level of agility, the typical Microbus seating position, plenty of space and flexibility as well as a roomy feel in the interior. In addition to its unique design, efficient electric drive and innovative sustainability, the ID. Buzz features today's leading automotive trends. With the very latest ID. software, intelligent networking of assistance and information systems and over-the-air updates, it also provides the technical basis for the autonomous shuttles that will be used for mobility services from 2025 onwards.

There is a huge sense of anticipation as we look forward to the digital world premiere of the ID. Buzz on 9 March from 7:00 pm (CET) via live stream | Volkswagen Newsroom (volkswagen-newsroom.com). Afterwards, extensive press material will be available from the Volkswagen Newsroom, including the press kit, numerous photos and video footage. An embedded link is also available so that the stream can be integrated in other websites. The English live stream will also be shown on YouTube.
