

Volkswagen Group Technology develops complete drive system for electric cars

PUBLISHED FEB 19, 2023
BY [VOLKSWAGEN](#)

At Tech Day 2023, Volkswagen Group Technology provided an outlook of upcoming electric car innovations in the areas of batteries, charging and electronic components. The focus was on the electric drive system of the future. For this purpose, Volkswagen is taking care of all the central components itself and, in addition to batteries and electric motors, is now developing pulse inverters and thermal management systems internally. The Volkswagen drive system coming from one source offers significant efficiency and cost advantages: Up to 20 percent more efficiency is possible through the optimal combination of individual components alone.
